

Data Center In a Box

The First All-In-One Portable Business Continuity Appliance!

Be A Company NOT a Statistic!

A recent IDC study concluded

“Companies experiencing a computer outage of 12 hours or more, 43% never reopened, 51% closed within two years of the outage, and a mere 6% survived over the long haul.”

What do you consider a disaster? This chart shows the most common causes of business downtime. It is that downtime that kills your business, halts revenue and can shut down your livelihood.

Our appliances allows you to replicate your servers on-site, giving you access to a secondary environment—ready at a moments notice!

When disaster strikes, simple fail-over and you're back up and running. Does your current solution work that quickly?

If you're simply backing up data, you are not protected.

Model	Ai1000	Ai2000	Ai3000	Ai4500	Ai6000
Usable Storage (RAID 5)	1TB	2TB	3TB	4.5TB	6TB
Chassis Type	All In One				
CPU	XEON 3400				
CPU Speed (GHz)	2.4				
Memory	8 GB ⁽¹⁾				
Ethernet Ports (Gb)	2		4		
Max Recommended Virtualized Servers	5		6		

(1) Upgradable to 24GB total memory (32GB in the future)

KEY DIFFERENTIATORS:

- Continuous data protection (CDP)
- Files can be rolled-back to any point in time
- Point and click failover from anywhere at any time
- Supports all major applications and databases
- Applications fail-over in either direction
- Doesn't require formatting before data is accessible
- Tape management is eliminated
- Backup windows are eliminated
- Systems can be migrated during normal business hours
- Recovery Point Objective (RPO) measured in seconds
- Recovery Time Objective (RTO) measured in seconds
